

Turtle Moon – Hannah Gold & Levi Pinfold

11-year-old Silver is wild at heart and loves nothing better than climbing trees. Her parents are desperate to have another baby, but not even medical intervention has worked for them. Family life has lost its colour and happiness – they all need a change of scenery and something new to focus on. Then her father is offered a four-month job in Costa Rica, painting pictures of turtles for a rescue centre. The plan is for the centre to sell his artwork, raising funds as well as raising awareness of the turtles' plight.

As Silver settles into her new life at the animal sanctuary, she makes a new friend, and he encourages her to become actively involved in safeguarding the turtles. A chance encounter with the rarest turtle of all results in Silver feeling the weight of new responsibilities, and when disaster strikes on a very stormy night, it is up to the two youngest turtle protectors to save many lives.

Running Wild – Michael Morpurgo

This novel, by the popular children's author Michael Morpurgo, is set in the Indonesian Rainforest. It tells the story of Will, who is left fighting for survival in the rainforest with an enchanting elephant called Oona.

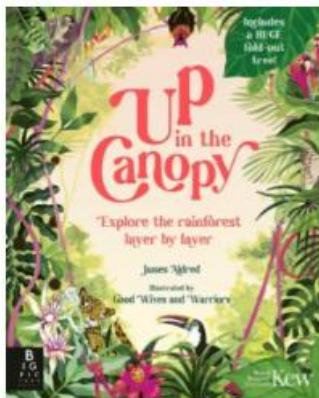

The Secret Explorers and the Rainforest Rangers – SJ King

In this fun, fact-filled children's science book, we follow rainforest expert Ollie on an exciting mission to rescue a lost baby orangutan in the steamy rainforest of Borneo. Accompanied by engineering expert Kiki, they set out in a glider to search for the friendly ape. Along the way, they encounter greedy plantation owners who are plotting to destroy the forest to expand a palm oil plantation! They also learn about the threat that endangered animals and plants face due to deforestation. Kids will love turning the pages to find out if the Secret Explorers manage to succeed in their mission!

Let's save the Amazon – Catherine Barr & Jean Claude

Discover why we must protect the Amazon from climate change. Bursting with all kinds of life, the Amazon is one of the most incredible places on Earth. This richly illustrated picture book brings to life this extraordinary region for young children, exploring its tropical rainforest and scenic landscapes. It showcases the lush wildlife, diverse communities and life-saving medicines that can all be found there and therefore why it is so important that we act to protect this special part of the planet from the impact of climate change.

Up in the Canopy – Good Wives and Warriors & James Aldred

Up in the Canopy explores the rainforest layer by layer, as we climb the incredible Kapok tree - a 100-metre tropical tree in the heart of wildest South America - in search of the elusive Harpy eagle which lives almost exclusively at great heights. With artwork as rich and dense as the rainforest itself, there is much to explore at every level, and readers can scour the forest floor, understory and canopy for the world's rarest and most beautiful tropical creatures. Finally reaching the top, they are rewarded with the most magical sight.

Our Planet – Matt Whyman & Richard Jones & Sir David Attenborough

The book has a foreword by Sir David Attenborough. What follows is a visual ode to Planet Earth told through extraordinary photography combined with appealing illustrations that draw in younger readers and help them to understand nature's amazing interplay of habitats and ecosystems. Small sections of text further explain the images, giving snapshots of animals' lifestyles as well as presenting hard-hitting facts about the dangers they face. We learn how orangutans have incredible mapping skills to navigate their jungle homes, but also how we lose 100 orangutans a week due to human actions like hunting and deforestation. We find out how beautiful lantern-fish light their way along with 17-metre long oarfish in the high seas, but also how plastic peril and high-seas fishing put the incredible marine life there in danger.
